

15 foreign currency accounts at Citi Handlowy

Citi Handlowy is offering its customers bank accounts in 10 new foreign currencies. Now, personal bank account holders have the availability of as many as 15 foreign currency accounts and attractive exchange rates through the Citi Kantor service. This is currently one of the broadest foreign currency offers on the market.

In addition to a Polish zloty account, Citi Handlowy customers may open bank accounts in: Australian dollar (AUD), Canadian dollar (CAD), Swiss franc (CHF), Czech crown (CZK), Danish krone (DKK), euro (EUR), British pound (GBP), Croatian Kuna (HRK), Hungarian Forint (HUF), Norwegian Krone (NOK), Russian Ruble (RUB), Swedish Krona (SEK), US Dollar (USD) and South African Rand (ZAR). As a result, together with the Citibank Global Wallet service, transactions without currency conversion costs can be performed with a single bank account card in 33 countries around the world. This includes point-of-sale payments, ATM cash withdrawals and, vital in these times, online payments.

Additionally, through Citi Kantor, customers can buy and sell in 210 currency pairs at very attractive exchange rates, comparable to those in online exchange offices. Citi Kantor is a convenient tool for those who travel abroad, shop in foreign currencies, repay FX loans or invest on the FX market. It offers advanced solutions such as Market Alerts (notifications about an expected exchange rate) or Order watch (sale of currencies at a designated rate), as well as advanced orders such as Stop, Limit, If Done, OCO (Order-Cancels-Order). The client can use these solutions conveniently both in the online version – within the Citibank Online electronic banking, and mobile version – within the Citi Mobile app.

We are glad that so many customers are already taking avail of the Citi Handlowy currency offer. New foreign currency accounts combined with Citi Kantor online exchange are one of the most extensive foreign currency offers on the market. The range of available currencies, and a very intuitive and simple operation supported by technological solutions are another step in the digitization of our services in the era of internet banking,” says **Andrzej Wilk, Head of Retail Products, Brokerage Services, Segments and Branch Network Management.**

Opening and maintenance of new foreign currency accounts are now possible via the Citi Mobile application. The process of opening a foreign currency account is simple and fast, and can be done by the customer himself/herself 24/7. New bank accounts are immediately visible after logging in to electronic banking. Soon, foreign currency accounts will also be able to be opened in other service channels: Citibank Online electronic banking, CitiPhone and at bank branches. The package of 15 foreign currency accounts will be exempt from account maintenance fees until August 2022.
